PERSONAL NOTE FROM OUR EDITOR-IN-CHIEF

Welcome to Issue 003 of the HiIT PLC E-Newsletter
The edition designed to prepare you for the most important year of your career: 2026.

If 2025 forced the world to accept AI, automation, cloud migration, cybersecurity evolution, remote work realities, and digital competition, then 2026 is the year everyone will be expected to use, apply, integrate, and leverage these innovations.

This issue is your blueprint for staying ahead.

Highlights Of The Week

2026: The Year of Doing, Integrating, and Fully Embracing Innovation

Let's face it — 2025 overwhelmed a lot of people. AI tools are everywhere. Automation is touching every field. Companies upgrading systems. Jobs were evolving faster than graduates could adjust and a new push for efficiency across every industry. If 2025 was the shock, **2026 is the response**

Companies will now want:

1. People who can use AI tools, not just talk about them.
2. People who can automate tasks, not observe the automation.
3. People who can analyse data, not just export CSV files.
4. People who can protect systems and not just know the theory.
5. People who can actually build – websites, dashboards, apps, designs, scripts, and strategies.

The global competition will be different. The expectations will be higher. The opportunities will be bigger... but only for those who took 2025 seriously. The real question is—will you be ready to perform in 2026? Not think. Not plan. **Perform.**

PROGRAM SPOTLIGHT

SIWES at HiIT PLC: Preparing Students for the 2026 Tech Reality

Gone are the days when industrial training meant sitting at the corner of an office doing “observe-and-go”. 2026 will reward hands-on skills — and that's exactly what we offer. Our SIWES program prepares students for the new skill environment. Whether you choose:

1. Software Development
2. Cybersecurity
3. Data Analysis
4. Cloud Computing
5. Web Development
6. Hardware and Networking

You'll leave with the kind of real-life experience employers now test for.

2026 will be the year where SIWES students who actually have skills will beat even graduates who don't. Make your SIWES count.

Our students success stories...

Wrapping Up My 6-Month SIWES Internship at [Hiit Plc](#)

This month marks the completion of my 6-month SIWES internship at [Hiit Plc](#), where I majored in Data Analysis. Throughout this journey, I worked with key analytical tools like Excel, Power BI, MySQL Server, and Python, and gained practical experience that has strengthened my confidence as a data analyst.

Looking back, the experience has been truly rewarding. I've learned how to work with real datasets, build insightful dashboards, write SQL queries, and apply analytical thinking to solve problems.

A big thank you to [Hiit Plc](#) and all my instructors for the knowledge, guidance, and support you provided. I genuinely appreciate the impact you've made on my learning journey.

I also had the privilege of expanding my skills through additional courses in Digital Marketing, Digital Literacy, Virtual Assistance, Crypto Trading Fundamentals, and Stock Trading, learning that I know will continue to add value to my career.

Here's to growth, continuous learning, and the next chapter.

[Connect](#) ...

Hello LinkedIn, it has been a while. I have been a bit quiet here, and I am working on changing that. Today I want to share something meaningful with you.

My SIWES Journey

I began my Industrial Training at [Hiit Plc](#) with only a basic understanding of computer networks and a desire to grow. What I gained went far beyond what I expected. I received practical experience in computer networking, took professional exams, and earned certificates in areas that strengthened both my technical and personal development.

One highlight was the monthly emotional intelligence webinar with the CEO of [Hiit Plc](#). Those sessions shaped the way I see teamwork, communication, and real workplace interactions. I also attended classes that expanded my understanding of how the business world operates and what it takes to thrive in it.

Most importantly, I met and worked with incredible interns who inspired me with their potential and drive. The relationships and lessons from that environment are things I truly value.

My time at Hiit Plc was full of learning, discovery, and growth. I am grateful for every moment and excited to apply everything I have gained as I move forward.

CAREER GROWTH CORNER

Five Skills You MUST Build Before 2026 Arrives

Here are the top skills people will actually be using in 2026:

Data Fluency

Not just dashboards — insights. Using tools like:

- Power BI
- SQL
- Python
- Microsoft Excel

AI Productivity & Automation

Tools you should start experimenting with:

- ChatGPT (advanced workflows)
- Notion AI
- Zapier
- Make.com
- ElevenLabs
- Runway ML
- Cursor AI for coding

Cybersecurity Proactiveness

Companies will want people who know:

- Threat detection
- Endpoint security
- Social engineering defence
- Cloud security basics

Cloud Skills

Everything is moving to the cloud — literally. Get familiar with:

- AWS
- Azure
- Docker basics
- Serverless computing

Real Development Skills

Not tutorial knowledge — actual ability to deploy.

- Frontend development (React, Vue)
- Backend development (Node.js, Python)
- Mobile apps (Flutter)
- Git & GitHub mastery

2026 will be a “show me what you can do” year.

CREATIVITY CORNER

The "2026 Prep" Challenge

For the next 14 days:
Pick one innovation (AI, automation, cloud, coding, cybersecurity, or analytics) and spend just 25 minutes daily learning it.

- By December, you'll be operating differently.
- By January, you'll be thinking differently.
- By 2026, you'll be competing differently.
